CHEMICAL RESISTANCE GUIDE

This information has been provided by our suppliers and other reputable sources; we believe it to be a partial listing of fluids that have been used with our feed pumps. The information is provided ONLY as a guide to assist in determining chemical compatibility. Testing under the specific conditions of the application is recommended. Stenner Pump Company assumes no responsibility for its accuracy. Outside factors including but not limited to temperature, pressure, mechanical stress, and solution concentration can affect material compatibility in a particular application. Stenner makes no warranty, expressed or implied, as to the accuracy of this guide or any materials' suitability for fitness or purpose for any application. User assumes all risk and liability for use of this guide.
